HUSH®

Desk Screens

Hush® Desk Screens bring acoustic comfort and visual privacy to open plan workspaces. Custom made to your exact size in either 18mm or 25mm and finished in a contemporary palette they reduce noise, support focus and enhance wellbeing.

Designed for modern workplaces, the acoustic properties help minimise noise reverberation, supporting quieter, healthier and more focused workspaces. Strong, durable and easy to install, Hush® is built to deliver long-lasting performance in a wide range of commercial environments.

Containing a minimum of 60% post-consumer recycled material (PET bottle flake) Hush® is completely safe, non-toxic, non-allergenic and non-irritant. Hush® contributes to a healthier indoor environment while enhancing privacy by creating personal work zones and reducing visual distractions.

The Hush® Acoustic Collection features a lightweight construction that is ideal for height-adjustable desks, helping to reduce the load on desk motors while maintaining excellent stability.

Its retrofit-friendly design makes it easy to upgrade existing workspaces with minimal disruption.

HUSH®

Flex Screens

Hush® Flex Screens are a natural extension to our Hush Desk Screens. They are versatile acoustic desk dividers whose Flex design allows us to bend and shape Hush® around corners while maintaining its structural integrity.

Hush® Flex Screens are multi-directional 18mm acoustic desk dividers that sit above the height of the worktop for quieter, more productive work spaces. Its pinnable surface adds extra functionality, allowing users to keep notes, reminders, and quick references within reach.

The Hush® Flex panel features a large 'V'-shaped cut-out, with its depth and angle optimally crafted to ensure full flexibility without sacrificing structural integrity.

Hush® Flex wraps around one side of the desk in an 'L' shape.

Hush® Double Flex wraps around on both sides of the desk in a 'U' shape.

Panels can have sloped or straight side edges with either square or rounded corners, making them adaptable to any office setting.

DIVI®

Desk Dividers

Divi® Desk Dividers are a stunning take on traditional privacy screens. They simply slide on to the desk, providing instant privacy and noise reduction between users sitting side by side.

Hush® Acoustic is a lightweight, semi-rigid panel known for its outstanding sound-absorbing qualities. Divi® provides instant privacy while absorbing reverberation of sound.

No installation is required, simply slide the light weight Divi® divider onto the edge of the desk, no mounting or clamps are needed, to create a focused and effective workspace. Divi® is the perfect, easy to fit, safer, quieter acoustic desk divider.

Manufactured from either 18mm or 25mm thick Hush® acoustic panel, Divi® comes in Square shape and Angled shape as standard. With a solid colour throughout, these panels can be cut to various sizes and shapes to accommodate any screen application or desk thickness.

Each order is custom-made, offering limitless possibilities. Please contact us to discuss your requirements.

PRIVI

Desk Hung Screens

Create personal workspaces with below desk modesty while reducing acoustic noise.

Privi is custom formed for every order from either Hush 18mm or 25mm acoustic panels. Its four flowing radial corners and clean lines form a distinctive physical barrier. With a modern clean designer look Privi also doubles as a pinnable surface for notes and reminders and that personal touch.

The perfect partner for height adjustable desks, Privi is strong, rigid and sturdy yet lightweight thereby reducing the weight load on the motors. Privi is also highly durable.

Designed to suit 18mm to 45mm thick worktops, Privi is discreetly mounted to the side of desk, hanging above and below.

Privi is available in fourteen colours, with the solid colour throughout, flame retardant and contains a minimum of 60% post-consumer recycled material (PET).

When time is of the essence our Quickship Privi Desk Hung screens in selected sizes and colours, and with a lead time of just 2 days may be the perfect solution.

PRIVI

Flex Desk Hung Screens

Multi-directional acoustic desk dividers that create a sanctuary for focussed work by combining above desk privacy and below desk modesty.

Privi Flex Desk Hung Screens provide multiple benefits such as creating a personal work space reducing visual distractions combined with below desk modesty, acoustic noise reduction between neighbouring users and a modern clean designer look.

The Privi Flex panel features a large 'V'-shaped cut-out, with its depth and angle optimally crafted to ensure full flexibility without sacrificing structural rigidity enabling the sides to wrap around to create a semi-enclosed nook.

The perfect partner for height adjustable desks, these are strong, rigid and sturdy yet lightweight thereby reducing the weight load on the motors.

Designed to suit 18mm to 45mm thick worktops, Privi Flex is discreetly mounted to the side of desk, hanging above and below.

Privi Flex wraps around one side of the desk in an 'L' shape while the Privi Double Flex wraps around on both sides of the desk in a 'U' shape.

Custom formed in 18mm for every order, panels can have sloped or straight side edges with either square or rounded corners, making them adaptable to any office setting.

CUBEX®

CUBEX
INDIVIDUAL ACOUSTIC CUBICLE

Individual Acoustic Cubicle

With so many ways to customise, Cubex® can create flexible workspaces to suit any environment.

Cubex® is a cubicle that provides a personal workspace by combining a visual barrier from busy office traffic and privacy from external noise thanks to the sound absorbing qualities of Hush®.

This personal barrier is composed of three 18mm or 25mm Hush® acoustic panels and is easy to assemble with its bracket-free integrated interlocking system. This ingenious design also allows for easy transportation.

Cubex® is ideal to retrofit to existing standard and height adjustable desks and workstations, causes no damage to existing furniture, results in no down time and is cost effective.

Comes in single or double and can be freestanding or desk mounted with brackets. It can also be easily configured in a 'Z' shape to create back to back workspaces.

Cubex® is available in a variety of colours and also provides the option of mixing different panel colours.

The return panels are offered as either a radial or curvature option.

HUSH POD®

Freestanding Acoustic Booth

Meet today's need of evolving and flexible work spaces with freestanding Hush® acoustic booths.

In response to the trend for enclosed private areas that facilitate individual headspace and support increased focus and privacy in the workplace, Presto Furniture has unveiled the HushPod® range of freestanding acoustic booths.

Lack of privacy and noise are two of the biggest gripes of the open plan office. Our latest range of HushPod® booths offers a refuge from everyday distractions and assist with individual focused work, telephone or video calls.

Designed to meet the needs of the modern workplace, they fit perfectly into any office or education environment.

Custom made as a single booth, the Hush Pod® can be made in any mixture of the 25mm Hush® colour range. The included worktop can be customised to any of the standard Laminex colours.

CHATTER BOX

HushPod
CHATTER BOX

Acoustic Office Booth

A revolutionary office solution designed for privacy within a busy workplace.

Noise distractions and interruptions are productivity killers. The HushPod® Chatter Box gives individuals the privacy they need to make a private phone call or focus on important work, away from distractions while minimising disruption to the rest of the office.

HushPod® Chatter Box provides a dedicated, quiet space where employees can concentrate on their work without distractions, leading to increased efficiency and better results.

The core concept revolves around utilizing environmentally friendly materials such as wood, Hush® acoustic and glass to significantly reduce carbon footprint and emissions compared to traditional metal or steel phone booths.

HushPod® Chatter Box can be made to complement any workspace. Customisable, the pods' sides are available in black or white laminate or any colour from the Hush® Acoustic range, pattern or solid.

CHATTER POD X

HushPod
CHATTER BOX

Acoustic Office Booth

A revolutionary solution for conference, meeting or collaboration spaces.

The HushPod® Chatter Pod X is designed to offer a sustainable alternative for conference, meeting and collaboration spaces within the busy office environment. The Chatter Pod X gives a small group of people plenty of room and privacy, away from the noise, distraction, and ears of their colleagues. These soundproofed spaces are ideal for confidential phone calls, video conferences, and sensitive discussions, ensuring that private conversations remain private.

The Chatter Pod X uses sustainable materials such as wood, Hush® acoustic and glass to significantly reduce carbon footprint and emissions compared to traditional metal or steel booths.

HushPod® Chatter Pod X can be made to complement any workspace. Customisable, the pods' sides are available in black or white laminate or any colour from the Hush® Acoustic range, pattern or solid.

Chatter Pod X includes two sofas finished in Aquarius/Indigo (water repellent) fabric and one meeting table finished in white laminate and a black matte base.

Soundproof Chatter Pod X offers companies an affordable, sustainable and flexible alternative to fixed construction.

HUSH® WALL

Acoustic Partition

A versatile freestanding acoustic partition system, designed to define and enhance open spaces.

Hush® Wall possesses an interlocking system which allows endless layout possibilities – from creating quiet breakout zones and defined meeting nooks to wrapping soft seating areas or segmenting open-plan spaces in classrooms, libraries, offices, and collaborative environments.

Constructed from 18mm Hush® acoustic panels, each wall delivers excellent sound absorption while remaining lightweight and easily reconfigurable.

Kits include panels to form a range of wall sizes, from 1450mm (W) x 1500mm (H) up to 2400mm (W) x 900mm (H). The pinnable surface also makes Hush® Wall ideal for interactive or display-friendly applications.

Each kit is supplied flat-packed with tool-free assembly for quick and simple installation. Each kit contains 80 tiles suitable to build walls 1450mmW x 1500mmH to 2400mmW x 900mmH.

TILES

Peel & Stick acoustic tiles

Quickly and easily turn any wall into a vibrant array of colour while also reducing noise reverberation.

Capable of holding its own as a feature or providing the perfect back drop or even as a communication hub, with its pinnable surface Hush® Tiles offer a multitude of possibilities.

Square, hexagon or your own design, Hush® Tiles add a layer of ambience by physically reducing reverberated noise and echo.

Hush® Tiles are very easy to install with their peel and stick commercial adhesive backing. They are 9mm thick and each pack contains 6 tiles of one colour.

Create custom Hush® Tiles with our peel & stick adhesive designed for application to any size or shape Hush® 9mm or 18mm panel. Hush® Tiles allow the easy transformation of any wall into a feature.

V-GROOVE

Textured acoustic panels

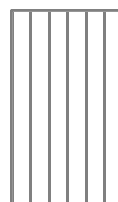

The art of geometric shapes to enhance the visual effect of colour and light. With Hush® Tessellate you don't have to sacrifice style to achieve a perfectly balanced acoustic environment.

Hush® Tessellate provides the opportunity to transform and individualise any of our Hush® Acoustic products to complement and enhance the work environment by adding depth, nuance and texture.

The subtle shadows cast within the patterns are an important element that further extends the design possibilities. These elements come together to provide a striking and varied effect depending on the environment they are used in.

Hush® Tessellate is achieved by cutting a physical 13mm wide angled wedge out of the 9mm or 18mm Hush acoustic panel to create our four standard patterns.

In conjunction with the superior acoustic performance of Hush®, fully customisable Hush® Tessellate allows you to tailor your environment and bring inspired detail to any space.
